

# Internship Program - Employer Application

Date

HIMSS Northern California is interested in helping further the educational experiences of health information technology students by facilitating internships at FQHC's and Community Clinics. The program has two basic goals:

- ◆ To provide a student majoring in HIT with hands-on experience in a clinic where technology is in use or being implemented; and
- ◆ To provide the clinic or health center a resource to help further their use of and adoption of Health IT.

Is your company a non-profit and if so, what is the 501 tax-exempt designation?

What skills would you look for in an intern?

Does your company currently support an internship or similar program? If so, briefly explain the process for selecting an intern and monitoring and mentoring an intern. If not, please skip to the next question.

What IT projects is your clinic currently working on? Which projects could an intern be assigned to? Can you describe the learning objectives that apply to this internship?

What would be the process for mentoring and providing feedback to the intern? How often would you meet with the intern?

In what ways would you measure the success of the intern's work?

What hours would an intern work at your clinic?

What days would you like an intern to work at your clinic?

Would you be willing to pay an intern to work at your clinic?
